CAT SWAP PARTS

Rush against Peterbilt, priced to the tech's list, with full core exposure

Every one of the 73 parts your technician actually asked for, priced line by line at Rush Truck Center Greeley and Jackson Group Peterbilt Cheyenne. Nothing added, nothing dropped. This revision folds in Peterbilt's updated quote of 08/05/26 and prices every option twice: once assuming the cores go back, and once assuming you eat them.

WHAT CHANGED ON 08/05/26

Peterbilt applied the $850 in CAT 2026 coupons. Their updated Q38373 now shows a $250 promo line against the overhaul kit and $600 against the six injectors. Their injector drops from $794.00 to **$694.00**, which now **beats Rush's $742.96**, and the overhaul kit drops from $3,285.95 to **$3,035.95**.

They are also crediting the cores on the face of the quote now. Five CORE RETURN lines totaling **−$5,572.06**. Previously they charged cores on top and you carried that float. Their quoted total is **$22,874.78**, already net of both the coupons and the core returns.

Two findings from the 07/29 sheet were wrong and are corrected here. Peterbilt does not double-list plunger `3929208`. The second line, at $28.81, is plunger `9M0853`, which I had also reported as missing. Both are on the quote as separate lines, so **Peterbilt covers 73 of 73**, not 72.

No unit price moved. Their gross before promos and core returns is still $29,296.84, matching the corrected 12:41 version of 07/29 to the penny. The only real reduction is the $850.

The two quotes, tech list only

IF CORES ARE EATEN	**$28,441.81**

CHEAPER ON EVERYTHING WITH A CORE

DO NOT COMPARE THOSE TWO TOTALS HEAD TO HEAD

They are not the same basket. Rush's $15,430.58 covers only the 69 lines they quoted. They never quoted the six cylinder packs `20R0630`, the water pump, the six shims `9Y3368` or gasket `1264935`. With MHC out, **Peterbilt is the only source for those four lines**, and they run **$6,703.39**. Any Rush order has to be topped up at Peterbilt regardless.

Rush's quote total of $18,639.77 is not your parts cost either. It carries roughly $3,200 of parts nobody asked for, including gasket kit `4366597` at $507.42, wiring harness `1920211` at $397.28, transfer pump `3848611` at $313.74 and three solenoids `1631533` at $388.62.

Two Rush quantities are short. One o-ring `8J4351` and eleven bolts `1T0414`. They also quoted six temp sensors `2644297` when the sheet asks for three, so three extra at $48.94 each. Getting that corrected pulls their number down about $147. Peterbilt has all three counts right.

Rush's quote expires 08/07/26. Anything below that leans on Rush needs re-confirming before you order.

Complete job, four ways, cores both ways

Every option buys all 73 parts. The left column assumes every core goes back clean and gets credited. The right column assumes you eat every core. Reality is somewhere between, but the right column is your true worst case and it reorders the ranking.

OPTION	WHO SUPPLIES WHAT	POS	PARTS, CORES RETURNED	CORE EXPOSURE	WORST CASE, CORES EATEN
1. Peterbilt only	All 73 lines on one PO	1	$22,869.75	**$5,572.06**	$28,441.81
2. Straight split	Rush for their 69 lines · Peterbilt for the four they cannot supply	2	$22,133.97	$7,179.02	$29,312.99
3. Split, injectors to Peterbilt	Option 2, but the six injectors move to Peterbilt at $694.00	2	**$21,840.21**	$6,215.90	$28,056.11
4. Split on core exposure	Rush for loose hardware only · Peterbilt for everything that carries a core, plus the four exclusives	2	$22,135.83	**$5,572.06**	**$27,707.89**
Spread, cheapest to dearest			**$1,029.54**	**$1,606.96**	**$1,605.10**

READ THAT TABLE THIS WAY

Option 2, the obvious split, is the wrong answer either way. Option 3 beats it on both measures, by $293.76 on parts and by $1,256.88 on worst case, for exactly the same two purchase orders. There is no scenario where option 2 is correct. It is on the sheet only so you can see why.

Option 1 is also beaten on both measures, by option 4. Same core basket, same core exposure, $733.92 less in parts. The only thing option 1 buys you over option 4 is one purchase order instead of two.

So the real choice is option 3 against option 4, and it comes down to one question: do you trust the camshaft and oil pump cores to go back clean? Rush is $295.62 cheaper on those two parts. Peterbilt is $643.84 cheaper on those two cores. Yes, they go back, take option 3 and save $295.62. No, or not sure, take option 4 and be $348.42 better off.

Either way, buy the injectors from Peterbilt. With the coupon they are $48.96 cheaper each than Rush, $293.76 across six, *and* their core is $160.52 cheaper each, $963.12 across six. Peterbilt wins that line twice over.

Core charges, line by line

These are refundable if the old units go back in the original boxes within the return window. Both vendors now credit them on the quote face, so neither quoted total shows them. That does not mean they are free.

PART #	DESCRIPTION	QTY	RUSH, EA	PETERBILT, EA	RUSH, EXT	PETERBILT, EXT	CHEAPER CORE
10R7155	Camshaft core	1	$1,359.41	**$1,084.71**	$1,359.41	$1,084.71	PBILT by $274.70
0R9697	Oil pump core	1	$1,487.74	**$1,118.60**	$1,487.74	$1,118.60	PBILT by $369.14

How the Peterbilt quote reconciles

LINE	AMOUNT	NOTE
Parts and cores as listed, before promos	$29,296.84	Matches the corrected 12:41 total from 07/29 exactly. No unit price moved.
Less CAT 2026 coupons	−$850.00	$250 overhaul kit, $600 injectors, both as PROMO lines
Less core returns	−$5,572.06	Five CORE RETURN lines on page 8
Quoted total on Q38373	**$22,874.78**	**Parts, sublet and freight all zero, no sales tax**
Less bearing `5L1100`, not on the tech sheet	−$5.03	The only off-list item on the quote
Tech list, 73 of 73, cores returned	**$22,869.75**	**Use this number for comparison**
Add back core exposure	+$5,572.06	If the old units do not go back
Tech list, 73 of 73, cores eaten	**$28,441.81**	**Your worst case at Peterbilt**

What to do

1. **Answer the core question first.** It is worth more than every price difference on this sheet. If the camshaft and oil pump cores go back clean, take option 3 and save $295.62. If you are not sure, take option 4 and be $348.42 better off in the worst case for identical core exposure.
2. **Buy the injectors from Peterbilt either way.** $694.00 against Rush's $742.96 with the coupon, $293.76 across six, and their injector core is $201.97 against Rush's $362.49, another $963.12 of float you do not carry. This is the single clearest call on the sheet and it reversed when the coupon landed.
3. **Confirm Peterbilt honors the $600 injector promo on a partial order.** Options 3 and 4 buy injectors from them without the overhaul kit. If the promo is tied to the full quote, options 3 and 4 each get $600 worse and option 1 becomes the better buy. One phone call settles it and it is the biggest single risk to this analysis.
4. **Peterbilt is your only source for four lines regardless.** Cylinder packs `20R0630`, the water pump, shims `9Y3368` and gasket `1264935`, $6,703.39 together. There is no all-Rush option, so you are opening a Peterbilt PO no matter what.
5. **Option 1, everything at Peterbilt, costs you $733.92 for the convenience of one PO.** That is the honest price of simplicity here. It is not a bad trade on a job this size, it is just a trade you should make on purpose.
6. **Rush's quote expires 08/07/26.** Re-confirm pricing before you order if you go with option 3 or 4.

7. **Fix the Rush quantities.** One `8J4351` o-ring and eleven `1T0414` bolts short, three extra `2644297` temp sensors at $48.94 each. Net that out and their number drops about $147.
8. **Strip the extras off the Rush quote.** About $3,200 of parts on 56371323 are not on your tech's sheet. Either your tech wants them and the sheet is short, or Rush padded it. One phone call settles which.
9. **Confirm the four substituted numbers with a counterman** before anything ships: `2280404`, `5B9603`, `5P4268` and `6V4365`. Both vendors cross-referenced them to CAT numbers and the quantities agree, but it is a five minute call against a torn-down engine.

Priced against the technician's parts order sheet (Simper, revised 11/19/2025), 73 lines. Sources: Jackson Group Peterbilt Cheyenne quote Q38373, updated copy dated 07/29/26 entered with an 08/05/26 ship date, account W41090, COD · Rush Truck Center Greeley quote 56371323 dated 07/23/26, valid thru 08/07/26. Peterbilt line extensions verified against their stated $22,874.78 total; the arithmetic ties to the cent through the $850 in promos and the $5,572.06 of core returns. Rush line extensions verified against their stated $18,639.77 balance due, which includes roughly $3,200 of off-list parts and is already net of core credits. MHC Kenworth and Bruckner's are excluded from this revision at the shop's direction. For reference, MHC quoted 68 of 73 lines at $19,419.56 with $5,739.66 of core exposure, and was never the cheapest complete job once cores were counted. This revision supersedes the 07/29/26 sheet, which reported Peterbilt at 72 of 73 lines with a duplicate 3929208. Both of those findings were wrong and are corrected above.
